Product info

Container: 1 litre

Consumption: 10-15 m²/litre

Available in white

Application area

WOCA Basic Soap is developed for basic treatment of furniture, interior and floors generally. Basic Soap is especially well suited for soaping of wood species such as oak, beech, ash, and soft wood. It does not discolour the wood and it saturates the wood grain.

Result

Basic Soap creates a unique "Scandinavian" white wash soft finish which is resistant to dirt and fluids.

Application

Make sure that the soap is applied in a uniform quantity on surface using a sponge or a short haired paint roller.

After care

After 24 hours the surface is cleaned with WOCA Natural Soap, White mixed with water 1:40, or WOCA Natural Soap Spray, White.

Maintaining and cleaning

Regular cleaning is done with WOCA Natural Soap, White mixed 1:40, or WOCA Natural Soap Spray, White.

How to do...

- WOCA Basic Soap:
Soap treatment of furniture, floors and interior

Tools

Wide brush for lye or water-based products.

Small round brush for profiles and edges.

Clean tools with water and soap.

WOCA Basic Soap is developed for basic treatment of furniture, interior and floors generally. Basic Soap is especially wellsuited for soaping of wood species such as oak, beech, ash, and soft wood. It does not discolour the wood and it saturates the wood grain. Basic Soap creates a unique "Scandinavian" white wash soft finish which is resistant to dirt and fluids.

Before the application of soap is done, make sure that the surface is freshly sanded with fine grit paper and cleaned with WOCA Wood Cleaner. Clean with 125 ml Wood Cleaner mixed with 5 litre water.

Basic Soap is ready to use and do not mix it with water. Shake carefully before use.

- 1 Pour Basic Soap into a plastic bucket. Make sure that the soap is applied in a uniform quantity on surface using a sponge or a short haired paint roller.

- 2 Immediately after, polish wet in wet with white or beige polishing pad until surface appears saturated. Possibly repeat application to ensure full saturation.
- 3 Immediately after polishing, remove any excess material with cotton cloths. Keep polishing until the surface feels soft and smooth. Leave the surface to dry for approx. 24 hours.
- 4 After 24 hours the surface is cleaned with WOCA Natural Soap, White mixed with water 1:40, or WOCA Natural Soap Spray, White. After drying the surface is ready to use. Regular cleaning is done with WOCA Natural Soap, White mixed 1:40, or WOCA Natural Soap Spray, White.
