Enabling wellbeing in every room

WICANDERS®

Nature at your feet

Wicanders has a legacy that goes back to 1868 and is the global leading brand in flooring products with cork technology. Present in more than 70 countries, its promise is to provide Floors for Living, ready for real life, for our home and office, for our different rhythms, for our family and pets, for all those wonderful and simple, yet sometimes unexpected moments. Floors for our lives.

Over the years, Wicanders has developed sustainable floor and wall coverings with exclusive properties due to its innovative Corktech technology. By combining state of the art technology with the exclusive natural properties of cork, a higher standard in flooring is achieved. Available with cork, wood and stone looks, its products are able to provide a silent and thermally insulated environment, that endures impacts and is very comfortable to walk and stand on.

Wicanders means wellbeing, a choice for life!

FROM NATURE, TO YOUR SPECIAL SPACE.

Technology only makes sense if it improves people's lives. This concept finds expression in products developed with Corktech technology.

By using a unique engineered multilayer structure, which combines state of the art technology with the exclusive natural properties of cork, a higher standard in flooring is achieved, providing the perfect match between design and wellbeing.

Wicanders uniqueness is daily achieved by continuously research on how end customers think and live their spaces. Wicanders brings to the market products that provide a silent and thermally insulated environment, that endures through time and are sustainable at the same time.

Class

Dance, laugh, play freely!

Around for many decades, Cork flooring has come into vogue in a major way mostly due to the fact that it is a green renewable resource that offers a unique set of benefits.

When it comes to choosing the ideal flooring for a child's bedroom, there's no better option than cork floors. Perfect for the ones that love to walk around barefoot, play freely, yet not worrying about being too loud with the toys on the floor. It is only a matter of choosing the most suitable look.

These full of class cork looks are available in natural, and light and dark painted colours that will fit and elevate your space as an out of the ordinary ambiance without surpassing the furniture and other decor elements.

Greenguard Certification helps the identification of interior products and materials that have low chemical emissions, improving the quality of the air in which the products are used. It promotes global sustainability, environmental health, and safety.

TÜV-PROFICERT-product Interior brand is a voluntary, independent label for VOC-emission and quality of floorings. The results comply with the emission thresholds of AgBB, Belgian VOC regulation, Finnish M1 classification, BREEAM Exemplary Level, LEED v4 (outside North America), RAL-UZ 120 and Austrian Eco Label (Guideline UZ 56).

As of January 2012, France has adopted regulations that limit total VOC emissions of building products. Manufacturers, selling their products in France must obtain a classification ranging from A+ (very low emissions) to C (high emissions). The declared goal is to improve indoor air quality in private/commercial buildings.

An Environmental Product Declaration is a verified document that reports environmental data of products based on life cycle assessment and other relevant information in accordance with the international standard ISO 14025.

The goal of the German Cork Association is to assure the quality of cork products, as well as the optimization of manufacturing processes and the support of research projects.

- (a) The following products were tested: Disinfectant, Petroleum spirit, C₂H₅OH, NH₄OH, Citric acid and Iodine.
- b) Grade 0 - Unchanged / Grade 1 - Very little change / Grade 2 - Little change / Grade 3 - Change / Grade 4 - Strong change.

When nature meets charm

In modern interior design, the creation of spaces with style and personality starts with beautiful and expressive floors. Aligned with the market trends, our team of experts has created an unique Class collection that combines different shapes of natural Cork.

Rich in style, charm and sophistication, and in harmony with nature, Class also provides an unmatched wellbeing that will for sure be very pleasant when getting together with family and friends.

Light coloured flooring like Flock Moonlight is the splendid background for soft colours and it will balance smoothly your classic and modern furniture with a minimalistic look.

Contemporary

Reinvented cork looks for sophisticated atmospheres

Contemporary homes are by definition visually light and functional. The “less is more” rule applies and all decor elements are carefully chosen.

When on a new project or remodeling an existing space, flooring takes place as one of the first decisions to be made. The style and type of benefits it can provide are highly considered during the decision process, in order to achieve the desired authenticity and functionality.

Fashionable Glacier has, for instance, a reinvented cork pattern veneer which results in an excellent option when creating a decor for a home open space. The neutral colour palettes will enable calm and relaxing atmospheres.

Contemporary Meet the Novel 3

Lose sight of ordinary spaces with these 3 Contemporary patterns: Twist, Edge, and Brick.

Designed by the renowned industrial designer, Antonio Bullo, this collection is the richest in geometry! Find your perfect fit and enjoy the subtlety that will hold hands with any remaining decoration.

If you want your flooring to be a blank canvas that allows other elements to be the focus, decide on neutral coloured visuals such as Novel Brick Flax or Novel Brick Drill and then add bold elements throughout the room.

Novel Brick Flax

“ Nature and geometry.

Cork, distinctive and unmistakable material, clearly shows its own characteristics.

An innovative production process guides its natural irregularities on the geometry of contemporary architecture. ”

Antonio Bullo

Renowned industrial Designer

Greenguard Certification helps the identification of interior products and materials that have low chemical emissions, improving the quality of the air in which the products are used. It promotes global sustainability, environmental health, and safety.

TÜV-PROFICERT-product Interior brand is a voluntary, independent label for VOC-emission and quality of floorings. The results comply with the emission thresholds of AgBB, Belgian VOC regulation, Finnish M1 classification, BREEAM Exemplary Level, LEED v4 (outside North America), RAL-UZ 120 and Austrian Eco Label (Guideline UZ 56).

As of January 2012, France has adopted regulations that limit total VOC emissions of building products. Manufacturers, selling their products in France must obtain a classification ranging from A+ (very low emissions) to C (high emissions). The declared goal is to improve indoor air quality in private/commercial buildings.

An Environmental Product Declaration is a verified document that reports environmental data of products based on life cycle assessment and other relevant information in accordance with the international standard ISO 14025.

The goal of the German Cork Association is to assure the quality of cork products, as well as the optimization of manufacturing processes and the support of research projects.

(a) The following products were tested; acetone, coffee, NaOH, H₂O₂ shoe polish.

(b) Grade 5 - no visible change / Grade 4 - very minor changes / damages at the surface / Grade 3 - minor changes / damages at the surface / Grade 2 - Strong changes / damages at the surface / Grade 1 - Surface destruction.

Technical solution

PROTECTIVE SURFACE

GENUINE CORK VENEER

AGGLOMERATED CORK 3,2MM / 5,2MM

Finishing & Warranty

For domestic areas that need a natural look and a soft touch, PU is the right solution.

For those seeking for a customized solution, the Sanded option is what you are looking for. The surface is prepared to be finished on-site, so you can select the finish that best suits your needs.

Xtreme WRT surface finish (Wear Resistance Technology) is the right choice to fit the most demanding needs of domestic areas. This environmental friendly varnish is based on a ceramic compound which ensures exceptional strength and longevity.

*Must be varnished on-site with minimum 3 coats of W-2000 or another recommended varnish.

**Must be varnished on-site with minimum 3-4 coats of W-2000 or another recommended varnish for this level of use (see recommendation table in the packaging).

Greenguard Certification helps the identification of interior products and materials that have low chemical emissions, improving the quality of the air in which the products are used. It promotes global sustainability, environmental health, and safety.

TUV-PROFICERT-product Interior brand is a voluntary, independent label for VOC-emission and quality of floorings. The results comply with the emission thresholds of AgBB, Belgian VOC regulation, BREEAM M1 classification, BREEM Exemplary Level, LEED v4 (outside North America), RAL-UZ 120 and Austrian Eco Label (Guideline UZ 56).

As of January 2012, France has adopted regulations that limit total VOC emissions of building products. Manufacturers, selling their products in France must obtain a classification ranging from A+ (very low emissions) to C (high emissions). The declared goal is to improve indoor air quality in private/commercial buildings.

An Environmental Product Declaration is a verified document that reports environmental data of products based on life cycle assessment and other relevant information in accordance with the international standard ISO 14025.

The goal of the German Cork Association is to assure the quality of cork products, as well as the optimization of manufacturing processes and the support of research projects.

(only for gluedown solution) Eco Mark is a Japan Environment Association program that promotes environment-friendly lifestyles through wise product choices. This certification analyses criteria for every product category taking into consideration the environment life stage.

Wicanders Flooring Collection is supported by a warranty. Please, read the warranty terms on www.wicanders.com

Get the best results with Wicanders accessories

Underlays

Increased comfort and insulation

To reinforce the already amazing insulation properties of cork flooring, Wicanders provides Acousticork, a cork underlay which lets you turn your home into an even cosier space.

Acousticork reduces the walking sound and heat dispersion. Overall, it makes rooms cosier and more peaceful, which is essential in making any house feel like home.

- High durability and long term resilience
- Increases floor thermal insulation
- Natural and sustainable product
- Easy to handle and install

Maintenance

Optimal care for an everlasting beauty

To keep your floor spotless, Wicanders has available a set of auxiliary products. Each of these has a specific purpose and is designed to make the caring of your floor as easy as possible.

Regular Maintenance

Wicanders Soft Cleaner

This mild detergent is appropriate for weekly or even daily cleaning. It can be used to remove dirt, stopping it from infiltrating in the joints and in the regular embossing of the product.

Wicanders Spray Cleaner

Designed for regular cleaning, this mild detergent has the advantage of being a spray, which makes it a quick and easy solution to apply directly on the floor. It is very effective in cleaning dirt or grease stains.

Skirtings

The perfect match to make a pleasant interior

In order to help create a more classy and harmonious interior, Wicanders provides skirting profiles to complement your floor. Create your ideal transition between the walls and the floor, whether by an exact match or contrasting colours.

Contact your supplier for information on the available skirting references.

CREATED BY HUMANS, INSPIRED BY NATURE

Wicanders represents a unique balance between the creation of innovative products and the protection of the environment, combining state-of-the-art technology with the amazing natural properties of cork.

A green production process – Cork waste resulting from the industrial process is 100% reincorporated into the production, creating an ecologically virtuous cycle.

Intensive use of biomass – The cork powder resulting from the industrial process is burned in order to create biomass which is then used as a major source of energy to supply the production facilities, allowing Wicanders also to base its production in a sustainable source of energy.

Low carbon emission – Cork's natural property of retaining CO₂ combined with an eco-sustainable industrial process allows Wicanders to develop eco-efficient products with a low carbon emissions factor, positively contributing to a sustainable environment.

Indoor Air Quality – Refined to be free of harmful phthalates Wicanders products have been awarded with worldwide indoor air quality certifications such as Greenguard Gold or A+.

Negative Global Warming Potential – The majority of Wicanders products contribute to reduce global warming, since they retain more CO₂ than they emit.

CORK - A SUSTAINABLE RAW MATERIAL

Cork comes from the bark of the Cork Oak, a slowly growing tree from the Mediterranean basin that may live for 200 years and plays a central role in the social and economic development of this region.

Truly environmental-friendly - The extraction of cork and its related industries are remarkably sustainable, since the tree is never cut or damaged during the extraction process and the bark regenerates after each harvest.

Positive ecological impact - It is estimated that the Portuguese cork oak forest - Montado - is responsible for retaining 5% of the country's annual CO₂ emission, representing 4.8 million tons per year.

An activity that crosses generations - Cork Oaks are manually harvested for the first time when the tree is 25 years old and then every 9 years making it an activity that passes from generation to generation.

A positive economic and social impact - Cork harvesting is a regular and cyclical process that contributes to environmental, economic and social sustainability of the rural areas in the Mediterranean region.

Rural areas economic engine - The cork activity as well as related activities fueled by this industry create jobs in many rural areas of the country, encouraging people to settle there.
