Group 1+2

Comfort
and silence
at your feet

Amorim **ECO21dB**

The perfect underlay
for LVT flooring

Specially designed to meet all LVT flooring requirements

Luxury Vinyl Tiles (LVT) are one of the biggest trends in the flooring market.

The variety of designs, structures, colours and easy & clean installation make LVT one of the most sought after solutions for all kinds of flooring surfaces: commercial and residential.

However, to guarantee the floor's durability and flawless appearance, an underlay must be installed. Amorim **ECO21dB** is the perfect underlay for this type of flooring since it improves living comfort and is ingeniously simple to process.

The agglomerated cork and recycled EVA is pressure-resistant and provides protection for the flooring against damage. **Produced from recycled and natural materials and crumb rubber free**, Amorim **ECO21dB** is a totally sustainable underlay that is compatible with underfloor heating systems, suited for levelling out localized uneven areas, able to withstand repeated loads of short duration, resistant against very heavy loads and protects LVT from damage to the click-system joints.

Amorim **ECO21dB** delivers unbeatable performance with reduced thickness, improving acoustic properties not only for impact noise but also for reflected walking noise, thereby improving quality live.

The latest technology under your feet

A high-angle photograph of a woman with brown hair tied back, wearing large over-ear headphones and a white sleeveless top. She is sitting cross-legged on a dark wood-grain Luxury Vinyl Tile (LVT) floor. A silver laptop is open in front of her, and her hands are on the keyboard. She is wearing white sneakers with red laces. The floor is made of large, rectangular wood-grain tiles. In the bottom right corner, a small portion of a different floor material, a speckled terrazzo or similar, is visible. The overall scene conveys a sense of modern, comfortable living or working.
