

ENVIROGRAF®

MANUFACTURERS OF PASSIVE FIRE PREVENTION PRODUCTS

Protecting Property - Protecting Lives

LIFE EXPECTANCY STATEMENT FOR ENVIROGRAF® COATINGS

Envirograf® Coating Systems will last the lifetime of the substrate, providing there is no damage to the coating.

You will need to carry out checks on the area to ensure there are no knocks or chips in the surface. If you find any, you will need to make good with Intumescent and Top Coat.

We would recommend that you re-apply the Top Coat every 3-5 years, as you would with general maintenance. For external areas, this may be more frequent, according to the weather and location, etc.

We have our products applied in buildings for in excess of 20 years and it is still in perfect condition.

'Envirograf' is a trading name of Intumescent Systems Ltd
