

SilenceCork 6mm is an eco-friendly acoustic underlay designed to provide impact sound insulation beneath ceramic tiles. Made from a blend of recycled car tyres and cork, contributing to sustainability while offering a resilient, permanent layer. This underlay helps reduce noise transmission between floors, enhancing the comfort and acoustic quality of spaces.

Specification

Characteristics	Result
Roll dimensions	15m ²
Thickness	6mm
Compression (%)	16 %
Density	610kg/m ³
Recovery (%)	>76 %
Tensile Strength	785 kPa
Boiling Water	No disintegration
Thermal Conductivity	0.10W/(mK)
Thermal Resistance	0.06m ² oK/W
Acoustical Results	19dB
